

Magnum Case History

Project Name: Mountain Cabin Addition

Magnum Installer: Highcraft Builders
Ft. Collins, CO
www.highcraft.net

Job Location: Masonville, CO

Project Type: Magnum Concrete-Less Foundation

Project Description:

6 Magnum Standard Duty Helix Foundation Piers were installed to an average depth of 12 ft. The final elevation of each pier was laser controlled, and the floor of the addition was framed on top of the helix foundation – thus eliminating the need to pour a concrete foundation.

Magnum Helix Concrete-Less Foundation
