

Magnum Case History

Project Name: Residential Lot Slope Stabilization

Magnum Installer: Marco Concrete Lifting
St. Albans, WV
www.marcoconcrete.com

Job Location: Elkview, WV

Project Type: Magnum Helix Tension Anchors
For Slope Stabilization

Project Description:

Marco installed 15 Magnum Helix Tension Anchors to anchor the TECCO mesh product to the slope. The Magnum Anchors were installed to an average depth of 18 ft. Once the TECCO mesh is installed, grass or other vegetation can grow naturally to hide the mesh and promote additional protection against slope failure. This job was successfully completed in 2 days in February 2004.
