

CASE HISTORY

IMG Wolf Run Generation Station

**(179) MH325BR piles &
MHC1082-3 caps**

**(40) MH530B-6 piles &
MHC1082-5 caps**

Provided all-steel, direct-connection foundations for a five unit generation station including all generation modules and auxiliary equipment foundations. The project site was very remote and this foundation style was very cost effective and allowed the installer to complete their scope weeks ahead of time.
